

This is not an eligibility list for rebates. This list is a resource of general information for sourcing a charging station.

[Click here](#) for a list of charging stations that are eligible for rebates from the Clean BC – Go Electric EV Charger Rebate Program.

Need a contractor for an EV charging installation? BC Hydro’s [Alliance Contractor Request Form](#) provides contractor referrals for a wide range of energy management projects.

Below is a list of Level 2 charging station manufacturers, technology, and local suppliers. The list below is for general reference and is not related to any rebate programs.

In some instances, you can order a charging station directly from the manufacturer. In other cases, you must go through a supplier. Additionally, some suppliers can also perform the installation of the charging station. Clicking on the manufacturer or supplier name will re-direct you to their website or provide contact information for you to reach them.

This list is not an eligibility list for rebates. This list is a resource of general information for sourcing a charging station.
