

Go Electric Fleet Charging Program

The **Fleet Charging Program** provides rebates to support public and private fleets deploy Zero Emission Vehicle (ZEV) infrastructure, and support services for organizations seeking ZEV solutions for their fleet needs.

Financial Program Offerings

Operational Support

Financial support is provided to customers to understand their existing fleet usage and requirement of infrastructure and electrical upgrades to support adoption of ZEV fleets.

This offering is open to fleets located in **Fortis BC service territory only**.

Fleet Assessments

ZEV Infrastructure Assessment

Electrical Infrastructure Upgrades

BC Hydro customers can access these incentives through **BC Hydro's Fleet Electrification program**.

Charging Infrastructure Support

Rebates provided to customers to design, procure and install EV chargers, to be used by their fleet.

This offering is open to all fleets in B.C.

Rebates are available for both:

Level 2 Charging Stations

DCFC Charging Stations

Non-Financial Program Offerings

Fleet Advisor

Fleet Advisor services provide expert support to organizations in the form of consultation, education, and advice; guiding them through all the steps required for fleet procurement of ZEVs.

To request ZEV Fleet Advisor services, drop us an email at fleets@pluginbc.ca

ZEV Training Sessions

ZEV Training Sessions help provide organizations access to **free tools and resources**, and **Go Electric Fleet Show**, which shares ZEV fleet success stories and general information on the adoption of ZEVs in fleets.

Submit your application for pre-approval by March 1, 2026. Final documentation must be submitted by December 15, 2026

**Funding is limited and will be allocated until exhausted, or until the end of the Program.*
